ABOUT THE PROJECT

With this project, our pupils will discover different learning methods with web2 tools while learning general English in a fun way. They will share their interests, needs, love, friendship feelings languages and any other things with the other participants of this project. They will not only get general English words but also learn to work together. with this project we both be active on our computers because of infectious disease and sometimes at school. we will enjoy all together but with English words...

AIMS

We hope our pupils will improve their English language skills such as reading, speaking, writing, listening and also grammar. We want them learn English by communicating. They will be active and productive in the process. at the same time our aim to make students like English lessons, tomake English lessons fun to ensure the active participation of the student, to give students the ability to express themselves and to make a nice start in their lives for english lessons...

WORK PROCESS

We will share the activities and subjects monthly. There will be teacher groups and they will prepare the parts of project with a web2 tools, an activity and with word knowledge

EXPECTED RESULTS

Our pupils will improve their English language skills. They will prepare presentations, posters, logos. We will play games about our words. We will learn lots of web2 tools they will feel more confident and they will have friends from different cities and countries. We will prepare an exhibition at the end. we will have common ebook and a picture book. we will have calender ...etc. And the most important thing; at the end, they will have fun and educational lessons all school periods.
